### Market commentary

Global markets opened on a strong note this year. The MSCI AC World was up by 5.81% led by an 11.34% rally in the Emerging Markets while the Developed Markets gained 5.02%. The Citigroup Global Government Bond Index extended gains by 1.47%.

Greece's dilemma of staying in or leaving the EU remains. The latest discussions at the EU summit held on the 30<sup>th</sup> January revealed a proposal by Germany for Greece to hand over control of its finances to a Eurozone budget commissioner before the newest terms of its bailout are agreed upon.

Earlier this month, Standard & Poors downgraded nine Eurozone economies including France. Later, Fitch downgraded Italy, Spain, Belgium, Slovenia and Cyprus citing financial weakness during the debt crisis. The downgrades continued as Egan Jones, an independent ratings company, downgraded Germany from AA to AA- due to all the debt that it is guaranteeing.

Portuguese bond yields have increased on the back of downgrades and fears that Portugal will follow in the footsteps of Greece. Yields on Portugal's two-year bonds and ten-year bonds surged to a record 21.4% and 17.28% respectively reflecting fears that the country will probably need a second bailout.

US data is looking more positive as US companies report their Q4 earnings – so far 66% beat expectations. The Fed announced that it will keep rates low until 2014. GDP came out at 2.8% for the fourth quarter of 2011 – a respectable headline number; and US unemployment decreased unexpectedly to 8.50%.

We continue to favour offshore equities, and maintain an overweight position in this asset class.

## ■ Risk warnings and important notes

Collective investments are generally medium to long term investments. The value of units may go down as well as up, and past performance is not necessarily a guide to the future.

Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated Total Return, Net of all fees and commissions and in US Dollar terms. Weekly Forward pricing is used.

A fund of fund collective investment scheme only invests in other collective investments, which levy their own charges.

Fluctuations in the value of the underlying funds and the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested.

The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and large falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the Fund will achieve its stated objectives.

The Fund may contain shares or units in underlying funds that invest internationally. The value of your investment and the income arising from it may therefore be subject to exchange rate fluctuations.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

Certain unregulated Collective Investment Schemes may permit a greater degree of leverage than is permitted with investment funds that are available to the general public in South Africa. Such Collective Investment Schemes have a greater underlying volatility, which increases the risk of loss.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.

This Report should be read in conjunction with the Prospectus of Momentum Mutual Fund ICC Limited and the Fund Supplement, in which all the current fees and expenses charged to the Fund are disclosed.
