

Ampersand Momentum CPI Plus 2 FoF

Monthly Feedback – 30 June 2013

Portfolio Objective

The portfolio aims to generate positive returns over the short term while beating inflation by two percent over a three-year rolling period. The portfolio will be managed to achieve stable growth and will comply with the Prudential Investment Guidelines at all times.

Investable Universe of Portfolio

In order to achieve this objective, the assets normally included in the portfolio will consist of assets in liquid form and participatory interests of portfolios of collective investment schemes or other similar schemes in equity, bond, money or property markets, registered in South Africa, or portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in South Africa. The portfolio may invest in multi-asset class portfolios and is not limited to certain asset classes. The manager will be permitted to invest on behalf of the portfolio in offshore investments as permitted by legislation. The portfolio will aim to achieve a minimum of 20% and a maximum of 30% in equity exposure.

Portfolio Manager

Tom Barlow

Portfolio Comments

The volatility that started at the end of May continued into June, with most investors taking profits on risky assets. This resulted in significant movements across asset classes, with risky assets being the most affected. This was a global phenomenon and not just a South African experience. The rand actually strengthened during the month of June after the May rout, recovering 1.34% versus the US dollar. The global economic environment continued to show vulnerability although some numbers out of the US were encouraging, especially US housing numbers. Market sentiment continued to deteriorate and resulted in more volatility as investors moved into cash. The local equity market lost 5.70% on the back of investors de-risking, especially the sale of resource-based stocks by foreign investors. Resources lost 13.60%, Industrials lost 2.85% and Financials lost 2.38%. SA listed property recovered some of the losses experienced in May, returning 4.38%, while SA bonds remained under pressure from foreign selling, with the ALBI losing 1.56% during the month. Global assets were also under pressure due to investor de-risking. Global equities lost 2.92%, global bonds lost 0.67% and emerging market equities lost 6.37%, illustrating the impact of declining risk appetite by global investors. We expect markets to normalise in the short to medium term after various central bank statements across the globe provided commitment to continued quantitative easing. Uncertainty in markets does remain high, but we remain cautiously optimistic due to a disciplined and proven investment approach. We remain cautiously positioned with a distinct focus on diversification across asset classes, geographies and investment managers/strategies.

Investment Performance as at 28 June 2013

Jun`13	0.219	1.582	1.801	1.438

Distribution takes place Semi-annually : June, December

DISCLAIMER

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Momentum Collective Investments Limited. Commission may be paid and if so, would be included in the overall costs. A Fund of Funds portfolio is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Momentum Collective Investments Limited reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of participatory interests apply to certain portfolios, which are subject to different fees and charges. Momentum Collective Investments Limited's portfolios are valued daily at 08h30. Instructions must reach Momentum Collective Investments Limited before 14h00 to ensure same day value. Performance figures quoted are from Morningstar, as at the date of this factsheet, for a lump sum investment, using NAV-NAV prices with income distributions reinvested. CPI/Inflation figures are lagged by one month. For the period from 01 April 2012 to 31 March 2013 the Total Expense Ratio (TER) is the percentage of the average Net Asset Value (NAV) of the portfolio incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Momentum Collective Investments Limited is the Manager of the Momentum Collective Investments Scheme, and a full member of the Association for Savings and Investment SA. The Standard Bank of South Africa Limited (PO Box 54, Cape Town, 8000) is the Trustee of Momentum Collective Investments Scheme. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, Momentum Collective Investments Limited does not accept any responsibility for any claim, damages, loss or expense, howsoever arising, out of or in connection with the information in this document, whether by a client, investor or intermediary.
