

**Ampersand Momentum CPI Plus 6 FoF**

**Monthly Feedback – 31 July 2013**

**Portfolio Objective**

The portfolio aims to generate positive returns over the short term while beating inflation by six percent over a three-year rolling period. The portfolio will be managed to achieve stable growth and will comply with the Prudential Investment Guidelines at all times.

**Investable Universe of Portfolio**

In order to achieve this objective, the assets normally included in the portfolio will consist of assets in liquid form and participatory interests of portfolios of collective investment schemes or other similar schemes in equity, bond, money or property markets, registered in South Africa, or portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in South Africa. The portfolio may invest in multi-asset class portfolios and is not limited to certain asset classes. The manager will be permitted to invest on behalf of the portfolio in offshore investments as permitted by legislation. The portfolio will aim to achieve a minimum of 60% and a maximum of 75% in equity exposure.

Tom Barlow

**Portfolio Comments**

Global equity markets performed strongly in July as talks of tapering have all but fizzled out. The MSCI AC World Index gained 4.60% in rand terms, regaining all of the losses experienced in June and more, ending the month in the green. Global bonds gained 0.96%. There has been a fair amount of perceived positive data out recently. In the US, inflation has ticked up and second quarter GDP beat estimates, although first quarter GDP was revised down materially. The majority of US companies reported earnings for the second quarter above estimates and above earnings reports of the same quarter the previous year. The IMF revised down their world growth outlook for 2013 and 2014 again, with the largest downward revisions in emerging markets, particularly South Africa and Russia. For 2013 world growth is now forecast at 3.10%, while growth in 2014 is forecast at 3.80%. Interest rates remain at all-time lows and central banks remain accommodative across the globe, and given inflation and growth expectations, this trend is likely to continue for the foreseeable future. Locally, the JSE All Share Index rose 4.41% for the month although bonds and property were negative, property being one of the biggest detractors, losing 4.19%. Resources were the biggest gainer in the month, rising 9.15%. Financials gained 1.42% but Industrials lost 0.36%. The rand strengthened by 0.18% to the US dollar. Local inflation came in lower than estimated at 5.50% and interest rates were kept on hold, in line with global standards, amid the weak outlook for the local and global economy. Unemployment increased in the second quarter to 25.60%. With uncertainty still hovering over us, and global valuations beginning to look fuller, we remain vigilant with a distinct focus on diversification.

**DISCLAIMER**

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Momentum Collective Investments Limited. Commission may be paid and if so, would be included in the overall costs. A Fund of Funds portfolio is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Momentum Collective Investments Limited reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of participatory interests apply to certain portfolios, which are subject to different fees and charges. Momentum Collective Investments Limited's portfolios are valued daily at 08h30. Instructions must reach Momentum Collective Investments Limited before 14h00 to ensure same day value. Performance figures quoted are from Morningstar, as at the date of this factsheet, for a lump sum investment, using NAV-NAV prices with income distributions reinvested. CPI/Inflation figures are lagged by one month. For the period from 01 April 2012 to 31 March 2013 the Total Expense Ratio (TER) is the percentage of the average Net Asset Value (NAV) of the portfolio incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Momentum Collective Investments Limited is the Manager of the Momentum Collective Investments Scheme, and a full member of the Association for Savings and Investment SA. The Standard Bank of South Africa Limited (PO Box 54, Cape Town, 8000) is the Trustee of Momentum Collective Investments Scheme. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, Momentum Collective Investments Limited does not accept any responsibility for any claim, damages, loss or expense, howsoever arising, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of Momentum Collective Investments Limited Limited's product.

FAIS Conflict of Interest Disclosure: Please note that in most cases where the Financial Services Provider (FSP) is a related party to Ampersand Asset Management and/or Momentum, Ampersand Asset Management and/or the distributor earns additional fees apart from the FSP's client advisory fees. It is the FSP's responsibility to disclose additional fees to you as the client.
