

VPFP CPI Plus 2 Fund of Funds

MONTHLY FEEDBACK - 28 February 2010

Portfolio Objective

The portfolio aims to generate positive returns over the short term while beating inflation by two percent over a three-year rolling period. The portfolio will be managed to achieve stable growth and will comply with the Prudential Investment Guidelines at all times.

Investable Universe of Portfolio

In order to achieve this objective, the assets normally included in the portfolio will consist of assets in liquid form and participatory interests of portfolios of collective investment schemes or other similar schemes in equity, bond, money or property markets, registered in the Republic of South Africa, or portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in the Republic. The portfolio will predominantly invest in multi-asset class portfolios and is not limited to certain asset classes. The manager will be permitted to invest on behalf of the portfolio in offshore investments as permitted by legislation. The portfolio will aim to achieve a minimum of 20% and a maximum of 30% in equity exposure.

Portfolio Manager

Celtis Capital - Tom Barlow

Portfolio Comments

World markets grew marginally during the month. The MSCI AC World Index saw 1.08% growth, led by the developed world which rose 1.38%. Emerging Markets lost 0.95% as global risk aversion reappears on concerns of sovereign default. The US labour market may be past the worst (unemployment has decreased to 9.7%) however it remains exceptionally weak, keeping consumer confidence levels extremely low. The JSE All Share increased by an insignificant 0.33%. Industrials led the way this month with 1.34% growth. Financials rose 0.97% but resources declined 1.01%. Bonds gained further momentum, rising 2.02%. The rand weakened a further 0.98%, tracking euro weakness against the US dollar amid diminishing investor risk appetite. The SA Budget announcement ran smoothly, with no big surprises. The Budget Deficit for 2009 came to 7.9% of GDP (1% in 2008). Q4 GDP grew by a greater than expected 3.2%, the second consecutive month of positive growth. CPI rose 6.2% (marginally down from the previous month but still outside of the target band) while PPI increased by more than anticipated 2.7%. The Trade balance reverted to a deficit of R3.3bn from last month's surprise surplus. We have marginally increased domestic equity weightings utilising an index fund as we begin to see value in earnings multiples on a one and two year view. In addition, we have increased exposure to a yield-targeting mandate which we believe will generate returns in excess of domestic cash.

Investment Performance as at 28 February 2010

DISCLAIMER

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The Manager may borrow up to 10% of the market value of a portfolio to bridge insufficient liquidity. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, UST, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue. A schedule of fees and charges and maximum commissions is available on request from RMB Unit Trusts Limited ("the Manager"). Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. A Fund of Funds Portfolio only invests in other portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. Figures quoted are from Morningstar, for the period ending **28 February 2010**, for a [lump sum / monthly investment], using NAV-NAV prices with income distributions [reinvested / excluded]. The Manager reserves the right to close certain Portfolios from time to time in order to manage them more efficiently. Different classes of participatory interests apply to certain Portfolios, which are subject to different fees and charges. The Performance Fee Frequently Asked Questions document is available on the website (www.rmbam.co.za). The TER of this class or portfolio will be higher than the quoted service charge of the manager. For the period from **01 January 2009 to 31 December 2009** each TER is the annualized percent of the average Net Asset Value of the portfolio incurred as charges, levies and fees. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Certain portfolios or classes include a Performance Fee in the service charge, which forms part of the TER. This report has been prepared and is made available for the benefit of RMB Asset Management clients and accredited financial advisors. The report is for information purposes only and is not to be viewed as an offer to purchase any specific product and is not to be construed as investment advice nor guidance in any form whatsoever. Investors and clients are encouraged to obtain independent professional investment and taxation advice from appropriately accredited financial advisors before investing in any of RMB Asset Management's products. All references to companies and securities are only included for the purposes of illustration. Whilst all care has been taken in the preparation of the information contained herein, no liability or responsibility will be accepted for any losses incurred as a result of acting on the contents of this report.

RMB Unit Trusts Limited's portfolios are valued daily at 15h00. Instructions must reach RMBUT before 13h00 to ensure same day value. RMB Unit Trusts Limited (Reg No.1987/004287/06) (Private Bag 9959, Sandton, 2146) trading as RMB Asset Management is the Manager of the RMB Mutual Fund Scheme, and a member of the Association of Collective Investments. The Standard Bank of South Africa Limited ((PO Box 54, Cape Town, 8000) is the Trustee of RMB Mutual Fund Scheme.
