

VPFP CPI Plus 2 Fund of Funds

MONTHLY FEEDBACK - 30 November 2011

Portfolio Objective

The portfolio aims to generate positive returns over the short term while beating inflation by two percent over a three-year rolling period. The portfolio will be managed to achieve stable growth and will comply with the Prudential Investment Guidelines at all times.

Investable Universe of Portfolio

In order to achieve this objective, the assets normally included in the portfolio will consist of assets in liquid form and participatory interests of portfolios of collective investment schemes or other similar schemes in equity, bond, money or property markets, registered in the Republic of South Africa, or portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in the Republic. The portfolio will predominantly invest in multi-asset class portfolios and is not limited to certain asset classes. The manager will be permitted to invest on behalf of the portfolio in offshore investments as permitted by legislation. The portfolio will aim to achieve a minimum of 20% and a maximum of 30% in equity exposure.

Celtis Capital - Tom Barlow

Portfolio Comments

High levels of volatility returned to global equity markets this month set off by the resurgence of the European debt debate, the downgrading of numerous major British and US banks, and the "reshuffling" of European politicians. Over the month, the MSCI AC World had peak to trough declines of 9.81%. The Citigroup World Government was also down 1.51%, Developed Markets ended down 2.69% and MSCI Emerging Markets declined by 6.75%. The month began with sharp falls as Greece announced it would miss its deficit targets this year and the next tranche of its bailout funding was delayed pending further austerity cuts. A separate auction in France saw the cost of borrowing jump from 0.92% to 1.72% for the two-year bond, reflecting growing concern that France's AAA sovereign debt rating was under threat. Italy and Spain and Belgium all had their Government debt downgraded. It should be noted that Dexia, a European bank, had to be rescued by the Belgian and French Governments. A strong rally followed towards the end of November after the release of encouraging US payroll figures and hopes of a resolution to the Eurozone banking crisis. US unemployment fell from 9% to 8.6% post a rise in private sector job employment. After much debate throughout the month, European leaders finally displayed a firmer commitment to guaranteeing the sovereign debt. The European Financial Stability Fund was increased in size and given additional powers to act, Eurozone banks were ordered to raise €106bn in new capital and Greek debts were reduced. The JSE All Share Index performed better than the global markets despite Moody's decision to change South Africa's outlook from "stable" to "negative", advancing 1.43% led by a 2.10% improvement in Resources. Industrials and Financials gained 1.35% and 0.61% respectively. Local bonds returned 0.01% and the rand posted widespread depreciation as global risk appetite reversed. Fourth quarter economic growth across the world is showing stability and OECD's Economic Outlook no. 90 reveals no alarming changes to its forecasts. We continue to favour equities, particularly offshore, and maintain an overweight position in this asset class.

DISCLAIMER

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The Manager may borrow up to 10% of the market value of a portfolio to bridge insufficient liquidity. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, UST, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue. A schedule of fees and charges and maximum commissions is available on request from Momentum Collective Investments ("the Manager"). Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. A Fund of Funds Portfolio only invests in other portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. Figures quoted are from Morningstar, for the period ending **30 November 2011**, for a [lump sum / monthly investment], using NAV-NAV prices with income distributions [reinvested / excluded]. The Manager reserves the right to close certain Portfolios from time to time in order to manage them more efficiently. Different classes of participatory interests apply to certain Portfolios, which are subject to different fees and charges. The TER of this class or portfolio will be higher than the quoted service charge of the manager. For the period 01 October 2010 to 30 September 2011 each TER is the annualized percent of the average Net Asset Value of the portfolio incurred as charges, levies and fees. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Certain portfolios or classes include a Performance Fee in the service charge, which forms part of the TER. **The report is for information purposes only and is not to be viewed as an offer to purchase any specific product and is not to be construed as investment advice nor guidance in any form whatsoever.** Investors and clients are encouraged to obtain independent professional investment and taxation advice from appropriately accredited financial advisors before investing in any of Momentum Collective Investments products. All references to companies and securities are only included for the purposes of illustration. Whilst all care has been taken in the preparation of the information contained herein, no liability or responsibility will be accepted for any losses incurred as a result of acting on the contents of this report.

Momentum Collective Investments portfolios are valued daily at 15h00. Instructions must reach Momentum Collective Investments before 13h00 to ensure same day value. Momentum Collective Investments (Reg No.1987/004287/06) (Private Bag 9959, Sandton, 2146). Momentum Asset Management is the Manager of the Momentum Collective Investments Scheme. The Standard Bank of South Africa Limited ((PO Box 54, Cape Town, 8000) is the Trustee of Momentum Collective Investments Scheme.
