## Portfolio Comments

Global Equities gained 1.5% this month in rand terms while Global Bonds lost -0.6%. The rand strengthened more than 1% to the US dollar this month which detracted from positive US dollar performance. US non-farm and private payrolls disappointed considerably and the labour force participation rate fell unexpectedly to 62.7%. US unemployment however remained unchanged at 5.5%. US inflation firmed despite slower economic growth, increasing 0.2% m/m. Although year-on-year inflation declined 0.1%, core inflation, excluding food and energy, climbed an encouraging 1.8% y/y. US Q1 GDP was dismal with growth dropping to 0.2% from 2.2% in Q4. Economists expected growth of 1%. The Fed kept rates on hold at its latest meeting but has indicated it will raise rates soon, as long as the US economy continues to grow. The timing of the increase remains uncertain. The People's Bank of China cut the reserve-requirement ratio by 1%, the most since the global financial crisis, just days after a report showed the slowest economic growth in six years (GDP grew at 7% y/y in the first quarter). Local CPI rose to 4.0% y/y from 3.9% y/y, below the 4.1% forecast. The biggest contributors were transport inflation and housing and utilities. Core inflation declined to 5.7% from 5.8%, indicating a broad-based decline in consumer demand. The JSE All Share Index experienced strong gains this month, adding 4.7%. Returns were broad based across the major sectors with Resources gaining +8%, Financials +4.2% and Industrials +4.1%. SA Listed Property was flat for the month and bonds lost -0.5%. We remain cautiously optimistic and continue to prefer growth-orientated assets, especially SA listed property and offshore equities but we remain well diversified as downside risks and volatility remain a concern.

Ampersand Momentum CPI Plus 2 Fund of Funds is a Fund of Funds CIS portfolio. A Fund of Funds, apart from assets in liquid form, consists solely of participatory interests in portfolios of CIS, which may levy their own charges, which could result in a higher fee structure for Fund of Funds than some other forms of CIS portfolios.

The Total Expense Ratio (TER) has been calculated using data from 01 January 2014 until 31 December 2014. The TER is disclosed as the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER is calculated quarterly but may additionally be re-calculated with effect from any significant portfolio restructurings and/or fee changes occurring. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. Performance figures quoted are from Morningstar, as at 30/04/2015, for a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month.
