Portfolio Comments

Global assets have produced fairly muted returns in US dollar terms this month. However the rand weakened by a substantial 4% which led to returns from Global Equities of +4.9% and +4.6% from Global Bonds in rand terms. Earlier this month, US Federal Reserve Chair Janet Yellen explicitly stated that she expects the first US rate hike to occur later this year, dependent on data. Yellen still believes that the appropriate pace of normalisation will be gradual, and that monetary policy will need to be highly supportive of economic activity for quite some time. US GDP grew by 2.3%q/q in the second quarter of 2015 (initial estimate). Growth was mostly driven by consumption, while business investment disappointed. US unemployment dropped to 5.3% from 5.5% with continued strong growth in private and non-farm payrolls. However the labour force participation rate dropped slightly. US Inflation remains well below the Fed's 2% target, at 0.1%. The SARB decided to increase interest rates by 25bps to 6.00% at its latest Monetary Policy Committee meeting. The decision largely reflects upside risks to inflation and the vulnerability of the rand, with concerns that rand weakness could push inflation sustainably above the 6% threshold. While the Reserve Bank acknowledges that the economy remains very weak, their primary mandate is to keep inflation under control. SA Inflation rose slightly to 4.7% from 4.6% but below expectations of a rise to 5%. SA unemployment eased to 25.0% in Q2 2015. Local Equities also experienced muted growth, rising 0.5% this month. Financial stocks gained 3.8% but Industrials lost -0.3% and Resources fell a hefty -8.5%. SA Listed Property gained 5.1% and local bonds saw gains of 1%. Concerns remain around global economic conditions and asset class valuations and as a result we continue to prefer a diversified approach in the portfolios. We continue to favour listed property and believe it will continue to add significant value over the next 3 to 5 years although we could experience some short term volatility which will present us with opportunities to increase the allocation further.

Ampersand Momentum CPI Plus 2 Fund of Funds is a Fund of Funds CIS portfolio. A Fund of Funds, apart from assets in liquid form, consists solely of participatory interests in portfolios of CIS, which may levy their own charges, which could result in a higher fee structure for Fund of Funds than some other forms of CIS portfolios.

The Total Expense Ratio (TER) has been calculated using data from 01 January 2014 until 31 December 2014. The TER is disclosed as a percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER does not include transaction costs. The TER is calculated quarterly but may additionally be re-calculated with effect from any significant portfolio restructurings and/or fee changes occurring. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. Performance figures quoted are from Morningstar, as at 31/07/2015, for a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month.
