**Monthly Comment**

The major driving force behind market movement and volatility this month has been the Brexit debate followed by the referendum vote that took place on 23 June. The MSCI AC World Index lost -7.5% and global bonds lost -3.5% respectively in rand terms.

Right up until the last votes, it was largely believed that the vote would be for Britain to remain in the European Union (EU). However, on the 23rd of June 2016, in a surprise outcome that shocked markets, Britain voted to exit the EU causing currency volatility, financial market turbulence and a myriad of uncertainty. In addition, the vote raises political and economic challenges in the UK, the EU and around the world. David Cameron has announced he will resign as UK prime minister by October. The initial reaction saw declines in global shares and other risk assets. Central banks across the globe are likely to pause the hiking of interest rates, including the US Federal Reserve. The Bank of England may cut interest rates to zero and resume Quantitative Easing (QE) to prevent excessive turbulence.

The JSE All Share Total Return Index declined -3.0% this month. Resources and financials both contributed to losses, falling -2.5% and -2.1% respectively. Industrials and SA Listed Property saw gains amidst the downturn of 3.0% and 1.2% respectively. Local bonds were also positive, gaining 4.0%, as investors sought safety. After strengthening to R14.31 to the US dollar, the rand initially weakened back to R15.15/US\$ on the Brexit news but then strengthened again to end the month 6.9% stronger to the US dollar, at R14.70/US\$.

Local GDP disappointed significantly with growth declining -1.2% (q/q) in the first quarter from positive 0.4% growth the previous quarter. Inflation was lower than expected at 6.1% against expectations for an increase to 6.4%.

With risk assets under pressure, we do expect to see some volatility and impact into our portfolios. However, the portfolios remain well diversified, with limited exposure to direct UK assets. Any potential rand weakness would benefit our offshore holdings. We urge investors to remain calm and although this is a significant event the portfolios are robust and designed to withstand shocks and reduce volatility.
