Monthly Comment

Last year's volatile global equity market has continued into the first quarter of this year. The MSCI AC World Index gained 0.08% while global bonds lost -4.74% in rand terms. The rand strengthened and managed to end the month on much firmer ground, at R14.65/US\$. The US Federal Open Market Committee ("FOMC") left its target range for the federal funds rate unchanged. The FOMC noted that the US economy was expanding at a "moderate pace". Recent economic developments outside of the US have prompted the Federal Reserve to take a more cautious approach to raising interest rates in 2016. The unemployment rate increased to 5.0% from a previous 4.9%. Consumer inflation remained contained, easing to 1.0%. In South Africa, inflation accelerated and came in at a much higher than expected 7.0% y/y, after surging to 6.2% in January from 5.2% in December. The upward pressure came from higher food prices and higher transport costs. The South African Reserve Bank ("SARB") lowered its inflation forecasts marginally, now expecting inflation to average 6.60% in 2016 from 6.80% previously. The SARB Monetary Policy Committee raised interest rates by 25 basis points after hiking rates by 50 basis points in January. The SARB currently expects the economy to grow by a modest 0.8% in 2016. The deterioration of growth coupled with an increasing interest rate environment suggests that the economy is potentially heading for stagflation. The JSE All Share Index ended the month up 6.44% led mostly by a strong recovery in Financials (11.51%). Resources and Industrials also produced positive returns ending the month up 5.08% and 7.84% respectively. SA Listed Property and bonds gained 9.48% and 2.63% respectively. We remain cautiously optimistic about the portfolios. Markets remain uncertain but our philosophy and investment approach has proven to be robust and effective in these challenging times. We urge investors to remain patient and committed to their chosen investment strategy.
