

Ampersand Momentum CPI Plus 6 FoF

Monthly Feedback – 31 December 2013

Portfolio Objective

The portfolio aims to generate positive returns over the short term while beating inflation by six percent over a three-year rolling period. The portfolio will be managed to achieve stable growth and will comply with the Prudential Investment Guidelines at all times.

Investable Universe of Portfolio

In order to achieve this objective, the assets normally included in the portfolio will consist of assets in liquid form and participatory interests of portfolios of collective investment schemes or other similar schemes in equity, bond, money or property markets, registered in South Africa, or portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in South Africa. The portfolio may invest in multi-asset class portfolios and is not limited to certain asset classes. The manager will be permitted to invest on behalf of the portfolio in offshore investments as permitted by legislation. The portfolio will aim to achieve a minimum of 60% and a maximum of 75% in equity exposure.

Tom Barlow

Portfolio Comments

Global equity markets ended the year positively with the MSCI World Index gaining 4.8% in rand terms, supported by the rand weakening against the US dollar, which lost 3.0%, ending the month above R10.30/US\$. Global bonds gained 1.9% in rand terms. The rand continued to depreciate against most major currencies. US Economic data was positive depicting a slow but steady recovery. Q3 GDP rose to 4.1% (from 2.5% in Q2), CPI to 1.2% from 1.0% and unemployment decreased to 7.0%. This encouraging data contributed to the Fed's announcement to taper the US bond buying program by \$10 billion per month, beginning January 2014. This "taper-lite" move combined with continued positive investor sentiment propelled global markets to a record close for the year. Despite this moderation in the bond buying program, the Fed will remain accommodative until significant gains in the economy can be seen, with interest rates remaining near zero for at least the next 18 months. Global growth and inflation remained mixed this month while unemployment showed improvement or remained stable in most major developed countries. Global banks continue to be accommodative with rates remaining stable. The local All Share Index ended the month with a record close gaining 3.0% for the month, while local bonds gained 1.1%. Mobile Telecoms lead the positive trend gaining 9.4%, Financials and Industrials each gained 2.4% and Resources gained 1.7%. Economic data was mostly positive with manufacturing production surprising positively at 1.5%, from -3.3%, displaying a recovery following strike disruptions in September. We maintain a cautiously optimistic approach and remain diversified across asset classes. We maintain a more active strategy in an increasingly risky environment.

Investment Performance as at 31 December 2013

Portfolio Data

DISCLAIMER

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Momentum Collective Investments Limited. Commission may be paid and if so, would be included in the overall costs. A Fund of Funds portfolio is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Momentum Collective Investments Limited reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of participatory interests apply to certain portfolios, which are subject to different fees and charges. Momentum Collective Investments Limited's portfolios are valued daily at 08h30. Instructions must reach Momentum Collective Investments Limited before 14h00 to ensure same day value.

Performance figures quoted are from Morningstar, as at the date of this factsheet, for a lump sum investment, using NAV-NAV prices with income distributions reinvested. CPI/Inflation figures are lagged by one month.

For the period from 01 October 2012 to 30 September 2013 the Total Expense Ratio (TER) is the percentage of the average Net Asset Value (NAV) of the portfolio incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.

Momentum Collective Investments Limited is the Manager of the Momentum Collective Investments Scheme, and a full member of the Association for Savings and Investment SA. The Standard Bank of South Africa Limited (PO Box 54, Cape Town, 8000) is the Trustee of Momentum Collective Investments Scheme. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, Momentum Collective Investments Limited does not accept any responsibility for any claim, damages, loss or expense, howsoever arising, out of or in connection with the information in this document, whether by a client, investor or intermediary.
