**Investable Universe of Portfolio**

The portfolio's investment universe consists of financially sound equity securities, preference shares, convertible bonds, property shares and property related securities listed on exchanges and assets in liquid form. The portfolio's equity exposure will always exceed 80% of its net asset value. The manager may also invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective schemes which are consistent with the portfolio's investment policy. Where schemes are operated in territories other than South Africa, participatory interests will be included in the portfolio only where the regulatory environment is of sufficient standard to provide investor protection at least equal to that in South Africa. The portfolio may invest in financial instruments and may also include unlisted forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

## Portfolio Comments

Overall global equity markets saw positive gains this month, in both US dollar and rand terms. The MSCI AC World Index gained 7.69%, however global bonds lost -0.30%, in rand terms. The rand strengthened by 0.71% against the US dollar, ending the month at R13.80/US\$. US economic data has been disappointing this month. US unemployment remained unchanged at 5.10% whereas economic growth slowed noticeably from 3.90% to 1.50% q/q. US CPI declined to 0% y/y from the previous month's 0.20% y/y. The US Federal Reserve left interest rates unchanged at 0.25% but a rate hike is still expected in December, keeping in mind that it is data dependent. According to the Q3 Labour Force Survey ("LFS"), the number of employed people in South Africa rose by an encouraging 171 000. The LFS indicates that 88% of jobs created over the past year were in the agriculture and informal sectors. However, the latest labour market data remains discouraging as the official unemployment rate in South Africa rose to 25.50% in Q3 2015, up from 25% in Q2. SA CPI again surprised on the downside in September, remaining unchanged at 4.60%. Inflation has consistently surprised on the downside throughout the year due to sluggish domestic demand, coupled with falling global oil and other commodity prices. The JSE All Share index ended the month up 7.61%. Most sectors contributed to this positive performance. Financials (6.93%) led gains, with Industrials and Resources gaining 6.81% and 5.93% respectively. SA Listed Property gained 2.08%. Areas of concern around global economic conditions and asset class valuations remain. As a result, we continue to prefer a diversified approach in the portfolios across different strategies. We are comfortable with the positioning of the portfolios at this time and continuously monitor the landscape for further opportunities to generate return.
