

Ampersand Momentum Equity Fund

Momentum Collective Investment Scheme (CIS) portfolio

Class A | Minimum Disclosure Document (MDD) as at 29 February 2016

Assets managed by: Ampersand Asset Management

Portfolio Objective

The Ampersand Momentum Equity Fund is an equity portfolio that seeks to sustain high long-term capital growth.

Investable Universe of Portfolio

The portfolio's investment universe consists of financially sound equity securities, preference shares, convertible bonds, property shares and property related securities listed on exchanges and assets in liquid form. The portfolio's equity exposure will always exceed 80% of its net asset value. The manager may also invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective schemes which are consistent with the portfolio's investment policy. Where schemes are operated in territories other than South Africa, participatory interests will be included in the portfolio only where the regulatory environment is of sufficient standard to provide investor protection at least equal to that in South Africa. The portfolio may invest in financial instruments and may also include unlisted forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

Portfolio Comments

The highlight this month was probably the 2016 Budget which was presented by the recently reappointed Pravin Gordhan. Much was expected of the National Budget and the overall tone received positive reviews. Global equity markets remained extremely volatile as global growth forecasts were downgraded. The MSCI AC World Index lost -1.41% whereas global bonds gained 2.12% in rand terms. The rand ended the month at R15.83/US\$. There is further risk to rand depreciation given an increasingly volatile global environment. The US economy has held up relatively well in early 2016. Job creation disappointed, but the unemployment rate still eased to 4.90%. For 2015 as a whole, the South African economy only managed to grow by 1.30%. Fourth quarter growth came in at 0.60%. The main drivers were finance and real estate and business services. Growth outlook for 2016 remain largely bearish and drought will continue to hurt agricultural production. SA CPI surprised and increased to 6.20% y/y, from 5.20% y/y in December. Food prices rose fairly significantly. Indicators suggest that cereal inflation is going to rise sharply over the coming months. This is partly because of the weaker Rand but primarily because of the current severe drought. The JSE All Share Index ended the month up 0.59%, driven largely by a sharp recovery in the Resource sector gaining 15.57%. Gains were led by Kumba as well as the gold sector. Financials and Industrials produced negative returns ending the month down -1.45% and -2.02% respectively. SA Listed Property gained 3.65%. We remain cautiously optimistic about the portfolios, but our concerns around market valuations and external risks remain. We need to urge investors to remain patient and committed to their chosen investment strategy as negative surprises are possible. We are comfortable with the positioning of the portfolios at this time and continuously monitor the landscape for further opportunities to reduce risk or generate return.

Disclosures

Momentum Collective Investments (RF) (Pty) Ltd (the "Manager"), registration number 1987/004287/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS) in Securities. The Manager is the manager of the Momentum Collective Investments Scheme, and MMI Holdings Ltd is a full member of the Association for Savings and Investment SA. Standard Bank of South Africa Limited (+27 (0)21 441 4100 PO Box 54, Cape Town, 8000) is the trustee of the scheme. Ampersand Momentum Equity Fund is a portfolio of the Momentum Collective Investments Scheme and Ampersand Asset Management (Pty) Ltd, registration number: 2007/006571/07, an approved financial services provider (FSP) under the Financial Advisory and Intermediary Services Act (No. 37 of 2002), FSP number: 33676, is responsible for managing the assets of this portfolio. CIS are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of units apply to portfolios, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently in accordance with their mandate. Portfolios are valued daily at approx. 15h00, latest prices can be viewed at www.momentuminv.co.za. Forward pricing is used. Instructions must reach the Manager before 14h00 to ensure same-day value. The Manager does not provide any guarantee, either with respect to the capital or the return of this portfolio. Additional information on the proposed investment can be obtained, free of charge, at www.momentuminv.co.za or may be requested from the Manager.

Ampersand Momentum Equity Fund is a third party named CIS portfolio, the assets of which are administered by Ampersand Asset Management (Pty) Ltd, registration number: 2007/006571/07, a registered financial services provider, FSP number: 33676. The Manager retains full legal responsibility for all third party named CIS portfolios under the Momentum Collective Investments Scheme.

The Total Expense Ratio (TER) has been calculated using data from 02 April 2013 to 31 December 2015. The TER is disclosed as a percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER does not include transaction costs. The TER is calculated quarterly but may additionally be re-calculated with effect from any significant portfolio restructurings and/or fee changes occurring. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Included in the disclosed TER is a performance fee of 0.00%.

Performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. Performance figures quoted are from Morningstar, as at 29/02/2016, for a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month.
