

Ampersand Momentum Equity Fund

Momentum Collective Investment Scheme (CIS) portfolio

Class A | Minimum Disclosure Document (MDD) as at 31 March 2016

Assets managed by: Ampersand Asset Management

Portfolio Objective

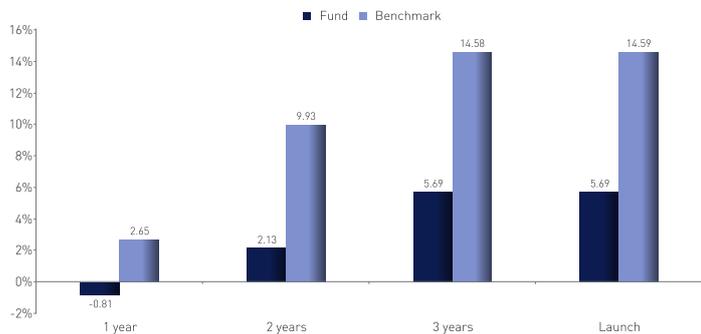

The Ampersand Momentum Equity Fund is an equity portfolio that seeks to sustain high long-term capital growth.

Investable Universe of Portfolio

The portfolio's investment universe consists of financially sound equity securities, preference shares, convertible bonds, property shares and property related securities listed on exchanges and assets in liquid form. The portfolio's equity exposure will always exceed 80% of its net asset value. The manager may also invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective schemes which are consistent with the portfolio's investment policy. Where schemes are operated in territories other than South Africa, participatory interests will be included in the portfolio only where the regulatory environment is of sufficient standard to provide investor protection at least equal to that in South Africa. The portfolio may invest in financial instruments and may also include unlisted forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

Portfolio Performance

Annualised returns (%)

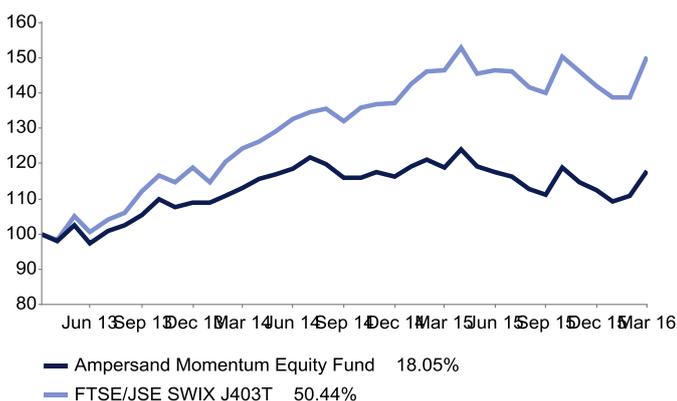

Yearly returns (%)

	Mar 14	Mar 15	Mar 16

Apr'15 - Mar'16	0.820	0.330	1.150

Distribution takes place Semi-annually : June, December

Risk/reward profile and 3 year statistics

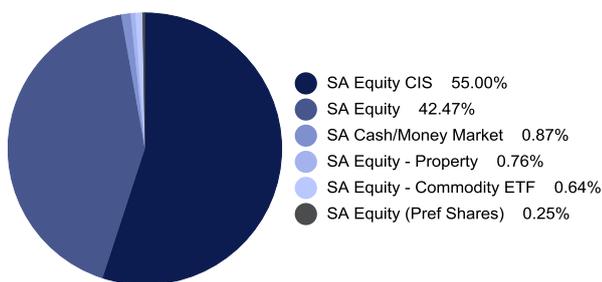

Specific risks

The fund is a pure equity fund with a growth objective, suitable for long term investors with a high risk tolerance seeking correlation with local listed equities. It is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

¹⁾Standard deviation – measures the volatility of fund returns ²⁾Sharpe ratio – fund return minus cash return (STeFI composite), divided by the Standard deviation (of fund returns)

Monthly Comment

Last year's volatile global equity market has continued into the first quarter of this year. The MSCI AC World Index gained 0.08% while global bonds lost -4.74% in rand terms. The rand strengthened and managed to end the month on much firmer ground, at R14.65/US\$. The US Federal Open Market Committee ("FOMC") left its target range for the federal funds rate unchanged. The FOMC noted that the US economy was expanding at a "moderate pace". Recent economic developments outside of the US have prompted the Federal Reserve to take a more cautious approach to raising interest rates in 2016. The unemployment rate increased to 5.0% from a previous 4.9%. Consumer inflation remained contained, easing to 1.0%. In South Africa, inflation accelerated and came in at a much higher than expected 7.0% y/y, after surging to 6.2% in January from 5.2% in December. The upward pressure came from higher food prices and higher transport costs. The South African Reserve Bank ("SARB") lowered its inflation forecasts marginally, now expecting inflation to average 6.60% in 2016 from 6.80% previously. The SARB Monetary Policy Committee raised interest rates by 25 basis points after hiking rates by 50 basis points in January. The SARB currently expects the economy to grow by a modest 0.8% in 2016. The deterioration of growth coupled with an increasing interest rate environment suggests that the economy is potentially heading for stagflation. The JSE All Share Index ended the month up 6.44% led mostly by a strong recovery in Financials (11.51%). Resources and Industrials also produced positive returns ending the month up 5.08% and 7.84% respectively. SA Listed Property gained 9.48%. We remain cautiously optimistic about the portfolios. Markets remain uncertain but our philosophy and investment approach has proven to be robust and effective in these challenging times. We urge investors to remain patient and committed to their chosen investment strategy.

Disclosures

Momentum Collective Investments (RF) (Pty) Ltd (the "Manager"), registration number 1987/004287/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS) in Securities. The Manager is the manager of the Momentum Collective Investments Scheme, and MMI Holdings Ltd is a full member of the Association for Savings and Investment SA. Standard Bank of South Africa Limited (+27 (0)21 441 4100 PO Box 54, Cape Town, 8000) is the trustee of the scheme. Ampersand Momentum Equity Fund is a portfolio of the Momentum Collective Investments Scheme and Ampersand Asset Management (Pty) Ltd, registration number: 2007/006571/07, an approved financial services provider (FSP) under the Financial Advisory and Intermediary Services Act (No. 37 of 2002), FSP number: 33676, is responsible for managing the assets of this portfolio. CIS are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of units apply to portfolios, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently in accordance with their mandate. Portfolios are valued daily at approx. 15h00, latest prices can be viewed at www.momentuminv.co.za. Forward pricing is used. Instructions must reach the Manager before 14h00 to ensure same-day value. The Manager does not provide any guarantee, either with respect to the capital or the return of this portfolio. Additional information on the proposed investment can be obtained, free of charge, at www.momentuminv.co.za or may be requested from the Manager.

Ampersand Momentum Equity Fund is a third party named CIS portfolio, the assets of which are administered by Ampersand Asset Management (Pty) Ltd, registration number: 2007/006571/07, a registered financial services provider, FSP number: 33676. The Manager retains full legal responsibility for all third party named CIS portfolios under the Momentum Collective Investments Scheme.

The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TER's. The disclosed TER is shown as an annual percentage based on data for the period from 02 April 2013 to 31 December 2015. Inclusive in the disclosed TER, the TER PF (%) shows the performance fee, as a percentage of the net asset value of the class of the Financial Product, that was recovered. The Transaction Costs (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product. TC are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. The disclosed TC is shown as an annual percentage based on data for the period from 02 April 2013 to 31 December 2015. The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC). The TER and TC have been calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. Performance figures quoted are from Morningstar, as at 31/03/2016, for a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month.

This document should not be seen as an offer to purchase any specific product and is not to be construed as advice. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of the Manager's products.
